

ESSENCE

RECESSED
PATIENT
SERVICE
CONSOLE

ESSENCE Series Recessed Patient Service Consoles provide economical, basic terminals for medical gas and utilities with simple, modern housing that is easy to install maintain and keep clean. They can be made in a variety of sizes and can be configured in different ways to bring medical gas, communications and power outlets to fixed locations.

BASIC CONSTRUCTION

ESSENCE Recessed Patient Service Consoles are assembled with extruded brushed aluminum main console panels flanked with sturdy composite end finishers creating a handsome, self-contained, compact and convenient wall unit. Various medical gas ports for oxygen, medical air and vacuum, along with outlets for electrical devices can be mounted within the console for easy access. The unit itself is recessed into the wall with most of the components contained securely within the wall itself. All supplied power outlets are Hospital Grade, 2 pole, 3 wire and rated for 15 or 20 amperes, 120
